Experience

Veygo

Full Stack Engineer

Jul 2021-Present

I've worked on multiple cross-functional teams and projects from delivering new products to our customers, building scalable services and workflows with Temporal, to collaborating with design and product teams on a DSM for our front-end apps.

Also heavily involved in our move to a more distributed architecture, from design to delivery. Leading on projects including our move to a Backend for Frontend architecture gaining experience in Node.js whilst developing our initial infrastructure and APIs setting the standards for future teams.

Mentoring engineers formally and more informally has been a great opportunity, helping them grow and also improving my own understanding of different aspects of working as an Engineer from Agile ways of working to more technical concepts.

Junior Full Stack Engineer

Jul 2019-Jul 2021

Started my professional journey here joining an incredible team of engineers gaining experience with Typescript (React) and Python (Django) as part of an Agile Scrum team that was closely involved with different functions of the business working on existing insurance products.

Skills

Typescript (React, React Native & Node)
Python (Django, Flask)
Infra (Terraform, Serverless)
CI/CD (CircleCI)
AWS
Pool 🎱

Education

Loughborough Uni

Sep 2016- Jul 2019

Computer Science - 2.1

Certifications

AWS Cloud Practitioner
